EXPERIENCE

Full Stack Developer | Dealerpull

Mar 2021 - Present

- Developed, implemented and supported overall web architecture for a multi-tenant SaaS platform
- Designed and constructed the REST API, integrating the front-end user interface along with it
- Upgraded existing codebase in order to improve the performance, design, stability and security
- Deployment and design of the database ensuring it met proper database design standards
- Increased performance by improving time efficiency of processes through reducing API calls
- Wrote end-to-end tests to prevent regressions using the Cypress testing framework
- Communicated with the business team in order to ensure solutions met business requirements and needs

Freelance Developer | Codementor

Mar 2020 - Mar 2021

- Codementor is an online platform for developers to instantly connect with experts for one-on-one live help or long term mentorships to improve their coding skills and knowledge
- Collaborated with over 125 clients to resolve issues while enforcing high quality coding conventions and through this maintained a 100% satisfaction rate along a 5 star rating
- Assessed and fixed client issues in React, Angular, HTML & CSS, JavaScript, PHP and SQL
- Awarded Codementor of the week 13 times for being a top performing mentor

Front End Software Developer Intern | ComQi

May 2019 - Aug 2019

- Implemented front end software components for a cloud based content management solution
- Built a good understanding of how to write well documented quality code through code reviews
- Improved the efficiency and design of how customers uploaded media content to the application which was well received by the design team along with the customers
- Worked with the front end team to implement product designs, requirements, and produce high quality software

Full Stack Developer Intern | PHRI

Sep 2018 – Jan 2019

- Created full-stack ASP.NET web applications for large budget drug research management
- Using Agile methodology, worked closely with business analysts and other developers in scrums
- Programmed the web applications using C#, JavaScript, HTML & CSS, SQL
- Applied my knowledge of Object Oriented and .NET concepts to solve bugs and add needed features
